"What an exceptional year" states Inge Patton, president of the prestigious European Institute of Esthetics.

"The results of the 2009 Skills Canada Competitions have brought me a great sense of pride in both our dedicated Instructors and outstanding Students. I think this goes to show the caliber of training our students receive. They are entering their new careers with the highest level of quality education available in Canada. I truly believe this is the result of the commitment of excellence we strive for at the European Institute of Esthetics.

With an enrollment only 3 x per year, our Instructors can focus on in-depth education as well it gives our students the opportunity to learn and practice in a structured class environment. We invite parents and future students to get in touch with us to learn more about a rewarding career in esthetics and the endless possibilities of a secure future."
